# Hetu Patel

8160463306 — hetu.alk.patel@gmail.com — linkedin.com/in/hetu-patel-61a8b1288/ — github.com/Patelhetu-177

**Summary —** Full Stack Developer specializing in MERN, Next.js, and Mobile Development (React Native/Expo) with a focus on GenAI and workflow automation (n8n). Proven problem-solver with a LeetCode rating of 1572 (450+ solved) and CodeChef 3★ (1653 rating). Experienced in building high-performance, cross-platform applications and secure enterprise-grade infrastructures while collaborating effectively in agile environments.

## Skills

**Languages:** JavaScript(Advanced), Java(Intermediate), C(Intermediate), Python(Basic)
**Frontend:** React, Next.js, HTML, CSS, JavaScript, Tailwind CSS
**Mobile:** React Native, Expo
**Backend:** NodeJs, Express.Js, REST API
**Database:** MongoDB, MySQL, PostgreSQL
**Cloud/Tools:** Docker, AWS (EC2, S3, IAM, Lambda), Git, github, Prisma, Postman, n8n
**Soft Skills:** Communication, Team Collaboration

## Experience

**INDEPENDENT SOFTWARE DEVELOPER** **July 2026 – Present**

- Built AttendMetric (attendmetric.com), a real-time seat-verified attendance platform for colleges with anti-proxy security, live on iOS, Android and web.
- Built FirstBookIt (firstbookit.in), a sports turf booking and tournament app with Razorpay payments and live scoring, live on iOS, Android and web.
- Built and launched the Shri Raj School website (shrirajschool.com) on WordPress with a custom staff CMS, enquiry forms and SEO.

**VIKARTR TECHNOLOGIES LLP** **January 2026 – June 2026**

*Full Stack Developer (Internship)*

Ethicare Financial Services

- Created multiple calculators (Stamp Duty, Loan Repayment, Interest) to support accurate financial decision-making.
- Implemented secure multi-role support for User, Agent, and Staff with role-specific dashboards and permissions.
- Built a responsive, high-performance frontend and seamlessly connected it to a scalable MongoDB backend.

KARBYNX – Digital Carbon Market Infrastructure

- Developed a high-performance cross-platform mobile application using React Native and Expo, providing a seamless user experience for institutional carbon credit management.
- Integrated enterprise-grade REST APIs to synchronize real-time data from IoT sensors and satellite imagery for automated monitoring and verification (MRV).

## Education

**Pandit Deendayal Energy University, Gandhinagar**
*B.Tech - Information, Communication and Technology / CGPA: 8.8 / Aug 2022 - May 2026*

**Uma Higher Secondary School, Visnagar**
*HSC (Higher Secondary School Certificate) / Percentage: 92% / 2020 - 2022*

## Certification

**Johns Hopkins University:** HTML, CSS, and Javascript for Web Developers

**Meta (Coursera):** Build Web Applications using Express.js and Node.js

## Projects

**FirstBookIt: iOS | Android | Web**

- Built a cross-platform sports booking and management app using React Native (Expo) and TypeScript, with role-based experiences for players, turf owners, and venue managers.
- Engineered the core turf/venue booking flow – venue discovery, court/slot selection, coupon codes, and Razorpay-integrated checkout, including a bill-splitting feature to divide payment among multiple players.
- Built a GPS-based running module using Expo Location with live run tracking, route flyover playback, run summaries, and QR-code event check-ins.
- Developed a full tournament management system for cricket and racquet sports with live ball-by-ball/rally scoring, auto-scheduling, and shareable live match reports, using React Query for real-time data sync.
- Deployed both frontend and backend on AWS, and integrated an n8n-powered chatbot for automated user support and query handling.

**AttendMetric: iOS | Android | Web**

- Built a seat-based smart attendance platform for colleges using Next.js, React Native (Expo), and a Node.js/Express, Prisma/PostgreSQL backend, where students mark attendance by tapping their seat on a live classroom map.
- Implemented real-time updates and push notifications with Socket.IO, plus optional seat sharing with professor-reviewed proxy detection, protected against race conditions using per-seat database locks.
- Built a admin tools for timetables, classroom layouts, bulk imports, and NAAC/NIRF reports, for students, professors, and IT admins.
- Shipped to the App Store and Google Play with over-the-air updates via EAS, and deployed the web app and API on AWS with automated GitHub Actions deployments.

**AvatarAI: https://avatar-ai-swart.vercel.app/**

- Developed an all-in-one AI platform using Next.js 14, Gemini AI, and Clerk to provide a secure and personalized environment for interactive learning and productivity.
- Built Companion & SkillWise, allowing users to chat with custom AI avatars and practice real-time voice interviews with automated feedback on clarity and confidence.
- Engineered DocHub, enabling users to upload PDFs or Excel files and use Vector Search (Pinecone) to ask questions and extract instant insights from their documents.
- Integrated an AI Resume Analyzer for ATS optimization and a Quiz module that generates topic-based tests with instant scoring and personalized improvement tips.
- Created Image Studio, leveraging Cloudinary for automated AI image processing tasks like background removal, enhancement, and format optimization.
